# Particulate Respirators Molded Style

## GERSON 1730 RESPIRATOR N95

- Electrostatically-charged filter media provides low breathing resistance.
- Latex-free, staple-free head straps for comfort and safety.
- Soft foam nose cushion.
- More durable, double-shell construction for long life and economy.

GSA Contract Holder

## GERSON 1740 RESPIRATOR N95

- Premium oversized valve opens more easily to expel hot air for cool comfort.
- Electrostatically-charged filter media provides low inhalation breathing resistance.
- Latex-free, staple-free head straps for comfort and safety. Soft foam nose cushion.
- More durable, double-shell construction for long life and economy.

GSA Contract Holder

## GERSON 1735 RESPIRATOR N95

- Layer of activated carbon provides comfort relief against nuisance levels of both organic vapors and acid gas.
- Soft foam nose cushion.
- Contoured nose-clip provides greater comfort and helps reduce potential fogging.
- Smooth latex-free polymer head straps won't catch on hair. No pre-stretching needed.
- Safer staple-free construction.
- Collapse resistant double-shell construction.

## GERSON 1745 RESPIRATOR N95

- Layer of activated carbon provides comfort relief against nuisance levels of both organic vapors and acid gas.
- Premium oversized valve opens more easily to expel hot air for cool comfort.
- Contoured nose-clip provides greater comfort and helps reduce potential fogging.
- Smooth latex-free polymer head straps won't catch on hair. No pre-stretching needed.
- Latex-free, staple-free head straps for comfort and safety. Soft foam nose cushion.
- Collapse resistant double-shell construction.

## ***Gerson®-brand products are well known and trusted throughout the world***

From air-purifying respirators, to liquid filters for cleaning paints and solvents, to adhesively-treated cleaning or tack cloths for removal of surface particulates, each Gerson® product has been engineered and manufactured to provide top performance and deliver user value.

Gerson is a prime manufacturer of its principle products, assuring that each product is produced to our unique and exacting specifications. For example, melt-blown filter material for particulate filtration, manufactured in Middleboro, Massachusetts, provides outstanding filtration characteristics for our filtering facepiece respirators and “prefilters” for chemical cartridges.

To assure the highest quality and purity of products as well as user value, all manufacturing in our USA facility is automated, utilizing proprietary equipment of our own design and manufacture. We also utilize overseas assembly operations, again using Gerson-owned and designed equipment, to remain globally competitive.

The Gerson spirit of over 50 years of manufacturing and product innovation remains strong. Continually developing new technologies to keep us on the cutting edge of progressive product development and innovation, Gerson is ready to serve your needs.
