

GERSON®

Elite™

PAINT STRAINER SYSTEM

Complete Contamination Control

+

Color-Coded Strainers

Available in 4 color-coded micron sizes for easy identification

A revolutionary total system, providing a clean-room manufactured strainer, dust-free storage and "no touch" tab dispensing to ensure that each strainer is 100% contamination-free at final use. Developed to provide the critical increased level of purity required for preparing today's waterborne, basecoat and clear-coat paints and endorsed by the leading manufacturers of refinish paints.

Clean-Room Produced

Gerson® Elite™ paint strainers are manufactured using Gerson's exclusive fully automated clean-room manufacturing process and spectrographically lot-tested filter material to ensure that each strainer is pure and 100% contamination-free.

Protected Storage and Dispensing

Gerson® Elite™ strainers are dispensed from the patent-pending Elite™ strainer dispenser that is designed to provide clean, dust-free storage and No-Touch tab-dispensing to ensure each strainer is 100% contamination-free at final use.

Sealed Packaging

Gerson® Elite™ paint strainers are automatically packaged in sealed pods to protect their contaminant-free purity until final use.

Defect-Free Finish

Manufacturers of today's hi-tech refinish paints, particularly waterborne finishes, mandate cleaner paint processing to ensure defect-free finishing. The Gerson® Elite™ Paint Strainer System delivers superior contamination control to help ensure a perfect finish. The Gerson® Elite™ System is endorsed by major paint manufacturers throughout the world.

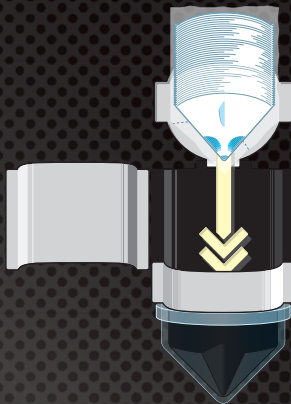

Eliminate the Risk of Finish Re-do

Paint Strainers made by hand contain significant levels of environmental and processing contaminants such as ambient shop-floor dust, hand oils and particulates from process steps, creating an unacceptable contamination risk to expensive paint finishes! Eliminate all contamination risk with the Gerson® Elite™ Strainer System.

Complete Contamination Control

Contaminant-free Storage and Dispensing

1. Place sealed strainer pod into dispenser, with strainer dispensing tabs facing forward.

2. Tear away protective plastic along perforations, then remove.

3. Close dispenser lid and dispense strainers downward one at a time by use of the dispensing tab.

ORDERING INFORMATION

Elite Starter Kits

PART #	DESCRIPTION	MESH COLOR	PACKAGING
012001-010714R	Elite Starter Kit 260 micron	Orange	1 Dispenser + 2 ea., 226 micron pods (250 strainers)
012001-010614Y	Elite Starter Kit 190 micron	Yellow	1 Dispenser + 2 ea., 190 micron pods (250 strainers)
012001-010814B	Elite Starter Kit 150 micron	Green	1 Dispenser + 2 ea., 150 micron pods (250 strainers)
012001-010914B	Elite Starter Kit 125 micron	Blue	1 Dispenser + 2 ea., 125 micron pods (250 strainers)

Strainers

PART #	MESH DESCRIPTION	MESH COLOR	PACKAGING
010714R	Synthetic 260 micron	Orange	4 Pods; 125 Strainers/Pod, 500 Strainers Total
010614Y	Synthetic 190 micron	Yellow	4 Pods; 125 Strainers/Pod, 500 Strainers Total
010814B	Synthetic 150 micron	Green	4 Pods; 125 Strainers/Pod, 500 Strainers Total
010914B	Synthetic 125 micron	Blue	4 Pods; 125 Strainers/Pod, 500 Strainers Total

Elite Dispenser

PART #	DESCRIPTION	PACKAGING
12001	Elite Dispenser	1 Dispenser/Box
